DERMACOL TIP

How to achieve perfect eyebrows?

- Your eyebrows should rise from the bridge of your nose to 2/3 of their length and then descend.
- Apply the powder eyebrow shadow/pencil from the bridge of your nose outwards and if needed, apply multiple layers.
- To determine the best shape, use two pencils. Place them crossways to the tip of your nose - one pencil is placed straight along the ala of your nose, the other should point towards your outer corner. Your eyebrow should end where the pencil meets it.
- Adjust the color of your eyebrows to the color of your hair (ideally choose a color that is one shade lighter).
- Do not dramatically change your basic eyebrow line - your natural eyebrow shape always complements your face the best.
